Invitation

Amsterdam Chemistry Innovation Day

Friday, 20 October 2017

Amsterdam Chemistry Innovation Day Programme, Friday, 20 October 2017

12:00	Lunch, registration and posters
13:00	**Nelleke van der Puil** **Vice President of Materials at The LEGO Group** *The LEGO Group's journey to leave a positive impact: Sustainable Materials* **Peter Schoenmakers** **Professor in Analytical Chemistry, Scientific Director of HIMS** *Future analytical devices: S, M, L and XL*
14.00	Coffee break
14.30	First round parallel sessions
15.15	Second round parallel sessions
16:00	Poster session and drinks
17:30	Dinner buffet
19:00	End

The Amsterdam Chemistry Innovation Day is a joint initiative of

- **Van 't Hoff Institute for Molecular Sciences** (HIMS)
  Chemistry research institute of the University of Amsterdam;
- **Innovation Lab Chemistry Amsterdam** (ILCA)
  Organisation that supports and connects the chemical industry, start-ups and knowledge institutions in the Metropolitan Region Amsterdam;
- **Amsterdam Green Campus**
  Connecting science, education and business in Green Genetics, Green Environment, Green Chemistry, Green Food and Green Entrepreneurship.

Invitation

Are you interested in chemical inventions and innovations?
Do you know what the Amsterdam Metropolitan Area has to offer in that respect? Find out at the ACID!

Three Amsterdam based chemical innovation organisations kindly invite you to the annual **Amsterdam Chemistry Innovation Day** (ACID) on **20 October 2017**. This event informs you about the latest chemical developments and innovations in the Amsterdam Metropolitan Area. Furthermore, you will meet chemists from other companies (from startup and SME to multinational) and academia as well as representatives of the Topsector Chemistry. A great opportunity to find potential partners and/or future employees to accelerate your innovations!

Participants can join two parallel sessions on current topics in chemistry (e.g. analytical developments and services, (catalytic) biomass and CO_2 valorization) and/or business opportunities and facilities (e.g. funding, business conditions for chemical companies in the region, labtours). Upon registration one can suggest subjects for parallel sessions too. Both academic and industrial participants will have the opportunity to present their innovations via a poster.

Venue	Van 't Hoff Institute for Molecular Sciences (HIMS) Faculty of Science, University of Amsterdam Science Park 904, 1098 XH Amsterdam
Registration	Please register via the web form on hims.uva.nl, before 6 October 2017. Participation is free of charge.
